Lublin in brief

Lublin is one of the cities you might have never heard of... According to The Telegraph. It is not a surprise, however, the same daily encourages tourists to pay a visit in this vibrant and multicultural city of south-eastern Poland.

The city is located approximately 200 km from Warsaw, the capital city, and 300 km from Cracow. It is easily accessible from all directions thanks to the airport and a network of modern roads.

With its rich history and dynamic academic community, Lublin hosts young and active people within its 70,000-strong student fraternity, including over 8,000 foreign students. In the scale of the whole Lublin region, 80% of all students gain their knowledge and experience in the city of Lublin.

Among numerous reasons why students choose Lublin as their academic centre, the comfort of life and high educational standards deem to be the most significant ones. Lublin's universities are constantly updating their infrastructure, educational offer, research facilities and they strongly support students' scientific and non-scientific activity.

Lublin in practice

HOUSING

- dormitories at all state universities in the city
- large number of private flats for rent close to the University campus

SAFETY

- meetings with police officers for international students
- assistance of university mentors for all international students at LUT

TRANSPORT

- efficient public transport
- student discounts with Polish university ID card
- system of City Bike and wide net of cycle paths

TOURISM

- 700-year history in an excellently preserved Old Town
- constantly growing number of hotels and tourist attractions
- multicultural and multireligious community

FINANCE

- official currency: PLN, Polish Zloty
- shopping in Lublin won't break your budget
- all types of products available at supermarkets and local markets

CULTURAL LIFE

- the biggest cultural centre in the eastern part of Poland
- numerous cultural events, concerts, exhibitions
- annual students' festival called „Juwendalia”
- European Youth Capital 2023

Services for students:

Student organizations

Wide variety of student organizations and extracurricular activities: get involved, develop your skills or discover hidden talents!
<https://pollub.pl/studenci/organizacje/organizacje-studenckie>

Language courses

Department of Foreign Languages (DFL): foreign language courses and certificates
<https://sjo.pollub.pl/en/>

Dormitories

Accommodation in dormitories: average cost of a place in a triple room amounts to ~100 EUR*
*pricing may change yearly

Library

LUT's Library: access to the newest academic publications, international databases and periodicals. Modern and comfortable place to study and relax.

Faculty

FACULTY OF MANAGEMENT

The Faculty carries out research and students' education into:

- finances and accounting
- marketing and market communication
- management
- accounting and controlling
- logistics engineering
- **Management: Innovation and Entrepreneurship (studies in English)**

FACULTY OF CIVIL ENGINEERING AND ARCHITECTURE

Students study there in two fields:

- architecture
- civil engineering

FACULTY OF ELECTRICAL ENGINEERING AND COMPUTER SCIENCE

The Faculty offers the following programmes:

- electrical engineering
- computer science
- multimedia engineering
- applications of information in electrical engineering
- mechatronics
- **Software Development and Web Services (studies in English)**

FACULTY OF ENVIRONMENTAL ENGINEERING

Students study there in three fields:

- renewable energy sources engineering
- environmental engineering
- recycling engineering

FACULTY OF MECHANICAL ENGINEERING

The oldest faculty at LUT; currently the students may excel in:

- biomedical engineering
- mechatronics
- mechanics and machine construction
- production engineering
- materials engineering
- transport
- management and production engineering
- robotization of manufacturing processes
- vehicle engineering

FACULTY OF FUNDAMENTALS OF TECHNOLOGY

Students may choose one of the following educational paths:

- safety engineering
- mathematics
- technical and computer science education
- data analysis and engineering

Practical information

ACCOMMODATION

Students may be accommodated in the Students' Residence Halls at the University Campus area. The condition of acceptance for accommodation is filling an application while registering for studies in the electronic recruitment system.

The number of places in the Hall of Residence is limited and the application does not mean the automatic reservation of accommodation.

- Rooms are equipped with beds, desks, desk lamps, wardrobes, kitchen annex, bedding, bed lining.
- One kitchen and shared bathroom per floor are at students' disposal.
- Each room has Internet connection.
- Room service is not provided.

HOW TO GET TO LUBLIN

- by plane to Warsaw, from Warsaw by bus or train
- by plane to Lublin
- by train to Lublin

AFTER ARRIVAL

- Take your original documents and visit Office of International Education
- Register at the Faculty Dean's Office
- Go to the Welcome Meeting
- Legalize your stay in Poland

INNOVATION AND ENTREPRENEURSHIP

MSc (magister)

Length of study: 4 semesters / 2 academic years

Programme description

The Innovation and Entrepreneurship students will be able to learn about modern management in many aspects including: strategic management, macroeconomics, finance and accounting, human resources management, production planning, legal issues of running business, ethics in business, marketing, advertising, quantitative methods, applications of IT in business.

Our teaching staff consists of specialists in multiple fields of management science as well as of law, computer science and applied mathematics. Many lecturers have also practical experience in business and consulting.

Career prospects

The specialty is intended to educate managers-to-be who can successfully face the challenges of the rapidly changing world including globalization processes as well as the impact of modern IT technologies. The educational process is not restricted to teach the graduates to act in the economically efficient way only. The overall approach to management education also includes the issues of social responsibility, ethics and sustainable development.

Key issues and competences

The graduate acquires a thorough knowledge in the field of economic, business and social processes, functioning of organization, team leadership as well as social communications and negotiations. The graduate is provided with skills of diagnosing and solving management problems.

Extra requirement: First degree diploma in the fields related to Management.

Details :

SOFTWARE DEVELOPMENT AND WEB SERVICES

MSc (magister)

Length of study: 3 semesters / 1.5 academic year

Programme description

The Software Development and Web Services students have the opportunity to familiarize themselves with three most popular mobile platforms: Android, Microsoft Windows and iOS. The studies curricula focuses on such subjects as: mobile databases, applications programming for three mentioned above platforms, designing applications and modelling them, software projects management, gathering information from mobile devices sensors, GIS and GPS usage and many other. All students will be given wide knowledge from the most important aspects of creating IT systems for mobile devices.

Career prospects

This study educates highly-qualified specialists, familiar with present standards and technologies used in mobile applications development. The graduates enter the European market and find jobs in the branch of IT as programmers, testers, analysts, project managers and many other positions correlated with software development.

Key issues and competences

The graduates:

- possess broad knowledge and skills necessary to create software for such mobile platforms as: Android, Microsoft Windows and iOS
- are able to be a member of developers teams
- are able to manage IT projects
- are able to design IT systems with mobile solutions
- understand application projects created in UML
- have skills to gather data from various sensors, process it and use
- can design and create databases for mobile devices
- know how to use GIS and GPS in IT solutions.

Extra requirement: First degree diploma in the field of Computer Science.

Details :

Let the students speak!

In Lublin I enjoy the most: the charm of walking in the old town it feels always like the first time walking there, or the lights in the Christmas period are really cozy. It feels cold but the warmth of the atmosphere makes the weather go good. What I've enjoyed the most in Lublin is the cultural center, in my opinion it's the most attractive and interesting building in Lublin or maybe even in Poland.

I like Politechnika Lubelska because: the staff, the teachers and administrators, are very welcoming. The university is made to welcome a huge number of students and whatever your culture or your country, you will always find your place in its establishment due to the diversity of the students who study at Politechnika Lubelska

Zohra, student from Algeria

In Lublin I enjoy the most having an amazing time with my new friends. ESN organizers helped a lot to find out many historical, beautiful and interesting places in Lublin. We enjoyed Paintball, Ice Mania, Aqua Lublin, Trampoline and all the charming sightseeing which Lublin has offered to us. It's a small and very cosy city to relax and have fun as well.

The main reason, why do I like Politechnika Lubelska is its amazing staff. Starting from our attentive and helpful international office coordinators ending with our friendly lecturers. I loved the infrastructure they provided and especially the magnificent Rusty Building with its amazing Library and librarians.

Irakli, student from Georgia

In Lublin, I enjoy the picturesque view of the town, the street atmosphere. In one word, Lublin is a relaxing town with many beautiful churches and points of interest. There is so much going on, with street entertainers, music, etc. Hundreds of pubs, restaurants and on the opened terraces of cafes, taking pictures and getting acquainted with local life. In general, Lublin is a charming East-European old town.

I like Politechnika Lubelska, because first of all, friendly professors. Secondly, the campus. It is so comfortable for students, so you can study with pleasure. Thirdly, I like the approach this University takes to my course. Fourthly, students organization availability. I want to say that university experience gives you the knowledge, skills, confidence and experience to help you make your world better, opens up a huge amount of new opportunities and lets you take control of your future.

Aigerim, student from Kazakhstan

In Lublin I enjoyed the most the diversity of all the students. It allows me to discover a lot of interesting culture that I have no idea about or to forget my prejudice about them. It was nice to discover them especially with the event that ESN Lublin organised like the Turkish night, the Tunisian night, the Portuguese night...

I like Politechnika Lubelska because the courses are really interesting and different comparing to France. Also the professors are helpful and good at explaining, you can see that they love teaching and almost always ask the opinion of students when they are explaining something so it's a good way to heard different point of view and be able to debate all together. And for last I really like Politechnika Lubelska because the Erasmus officer are always following you, if you need anything or you have any questions they will be happy to help you and answer all of your questions.

Anelle Alfred, student from France

I enjoy the most seeing new kind of buildings with an attractive architecture like the Old Town, visiting museums (Muzeum Lubelskie, Majdanek, Lublin Castle, ...), means of transport are available 24h/24h (Bus, taxi, ...), also tasting new foods (Pierogi, ...), discovering new cultures and the history of Lublin and making new friends all around the world.

I like Politechnika Lubelska because I found a friendly environment, especially in International Exchange Office. They help each student with their beautiful smile as well as they can. Also the organization of ESN helped me to develop my confidence and communication skills with the events that they organized. And we mustn't forget the teaching staff. They open a world of possibility and make learning FUN!, they showed us new technologies and give us a lot of advises to help us how we can think about our futures and our careers. They are not only teachers, they are mentors, coaches, motivators, supporters, and friends.

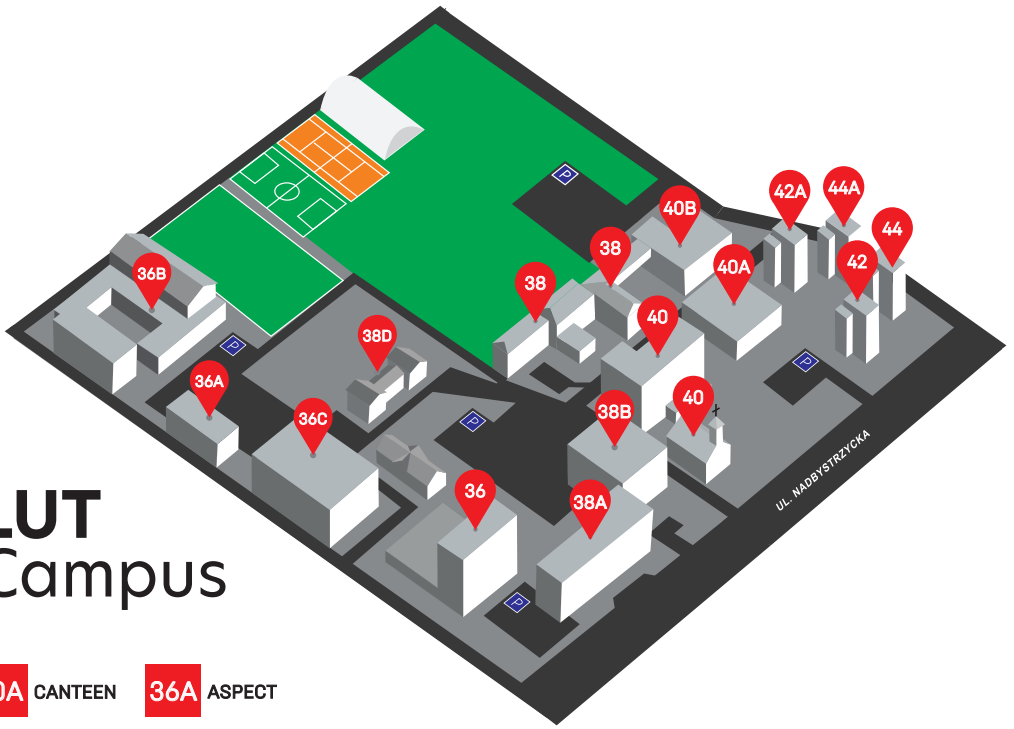

Montassar Ayari, student from Tunisia

In Lublin I have made a lot of friends from different countries and I have had an unforgettable moments with them. I was so glad and happy to study and stay in Lublin! In my life it was good experience to study at Politechnika Lubelska, because I have received a good opportunity to study at one of the best universities in Europe. In Politechnika Lubelska I liked campus and dormitory.

Nurbek Turganbek, student from Kazakhstan
