

## **Procedures in the event of an alarm warning of an air attack threat for staff and students**

### **ALARM SIGNAL**

In the event of a threat:

- you will hear an alarm signal (a modulated siren sound lasting 3 minutes), you will receive messages from the RCB Alert system (SMS) and regional warning systems;
- you will hear a voice announcement: “Attention! Alarm – possible air attack. Please proceed to the nearest safe zones and remain there until further notice.”

### **PROCEDURES:**

1. Stay calm.
2. Take your personal belongings and secure the room. Persons conducting classes in laboratories are obliged to switch off running machinery, shut off the supply of technical gases and the main power supply (if doing so does not delay the evacuation).
3. Go to the places designated as shelters in the building you are in.
4. Do not run and do not panic – move calmly. AVOID LIFTS!!!
5. Follow the instructions of the evacuation coordinator.
6. Provide support and assistance to people with special needs (people with reduced mobility, visual or hearing impairments, or those experiencing panic attacks). If someone needs help, inform the evacuation coordinator.
7. Remain in the shelter until the alarm is called off.
8. If there is no room left in the designated shelters on the Lublin University of Technology campus, go to the nearest protective structures in the City of Lublin.

### **NOTE:**

1. The shelters designated in Lublin University of Technology facilities have been selected as places safer than others, providing short-term protection. As a rule, such places are located on the lowest floors of a building, i.e. basements and rooms on levels 0–2.
2. All safety guidelines for the City of Lublin can be found on the City Hall website: <https://lublin.eu/mieszkancy/bezpieczenstwo/>.
3. Shelters in the City of Lublin can be found on the following websites:
  - <https://gdziesiekryc.pl/>
  - <https://lublin.eu/mieszkancy/bezpieczenstwo/budowle-ochronne/>  
(The updated list of collective protection facilities is available for download at the bottom of the page.)
